PROFILE

I am a senior student in the Industrial Engineering Department at Hacettepe University, Turkey. I have participated in one of the biggest student clubs at Hacettepe University. I chiefly know how to launch a marketing campaign. In addition, I am familiar with certain business analysis steps. In July 2021, I completed YetGen education, which is a 12-week 21st-century competencies training program. My career goal is to become a qualified machine learning engineer. I believe that learning would continue throughout life, and I am eager to improve myself in this field. Also, I am looking forward to specializing in Artificial Intelligence.
